Jazmín Calimano Colón

6241 N. Winthrop Ave., Chicago, IL 60660| (787) 994-3843 | jazmincalimano@gmail.com

Summary

Data analyst with a background in laboratory science and current M.S. candidate in Civic Analytics. Skilled in data wrangling, statistical modeling, and data visualization in R, with a focus on translating complex civic and demographic data into actionable insights for public policy and community impact.

Experience

Research Assistant | Great cities institute | October 2026 – Present

- Collect, clean, and organize large sets of data from various sources.

Data and Impact Intern | BUILD Chicago, Inc. | October 2025 – May 2026

- Imported and checked over 100 client profiles using Excel to make the onboarding process more efficient.
- Organized automated email and SMS reminders for client intake to help improve paperwork completion rates.
- Researched Social Return on Investment (SROI) frameworks and delivered a presentation to staff to support the planning of our organization's impact measurement.
- Reorganized the shared drive for Apricot and Microsoft to improve data accuracy and make it easier for staff to find records by reducing duplicates and misfiled documents.

Data and Operations Intern | Engaging Networks | Summer 2025

- Analyzed historical data from more than 10 conferences held between 2022 and 2025 to identify engagement trends and produced visual reports that informed the event strategy.
- Reviewed and updated over 1,000 Salesforce records to enhance CRM reliability for reporting and lead generation.
- Translated insights from qualitative survey data into targeted communication plans for attendees to enhance event logistics.

Cyber Navigator | Chicago Public Library Foundation | February 2024 – May 2025

Research Technologist III | Northwestern University Transplant Biorepository | March 2022 – Dec 2023

Education

B.S. in Chemistry | June 2019 | University of Puerto Rico
M.S. Civic Analytics | expected 2027 | University of Illinois, Chicago

Skills

- Data Analysis in R: data wrangling and visualization
- Machine Learning
- Statistical modeling
- Bilingual in Spanish and English
- Database management: Apricot and Salesforce
- Git and GitHub

Projects

Hardship Index & Library Engagement in Chicago Research Project

- Analyzed relationships between community hardship scores and library visitation across all 77 Chicago community neighborhoods using ACS and Chicago Public Library data in R.
- Applied a random forest model and clustering classification to identify factors associated with low engagement and predict at-risk communities.
